

FasTrack Pro v1.0 Instructions for a New Installation

DO NOT USE THESE INSTRUCTIONS FOR AN UPDATE OF AN EXISTING INSTALLATION!

*These are the basic instructions for a New Install of FasTrack Professional Version 1.0, **please read the entire instructions through prior to installing.** You should note that with older systems this process will take some time, easily 60 minutes or more, for the much slower systems to complete the entire operation. It is important to set aside ample time when the system will not be interrupted in the process. After the close of the business day may be the safest time. Backing up the existing system prior to update is highly recommended.*

Important Notices: Please Read Before Continuing

Auveco licenses the use of FasTrack only through qualified Auveco distributors. THE DISTRIBUTOR IS RESPONSIBLE FOR INSTALLING AND MAINTAINING THE SOFTWARE and is the first source of information, training and the supplying of regular updates to his FasTrack customers.

The FasTrack User's Manual is located on the CD in the "Documents" file folder. Please print and read the FasTrack User's Manual before proceeding!

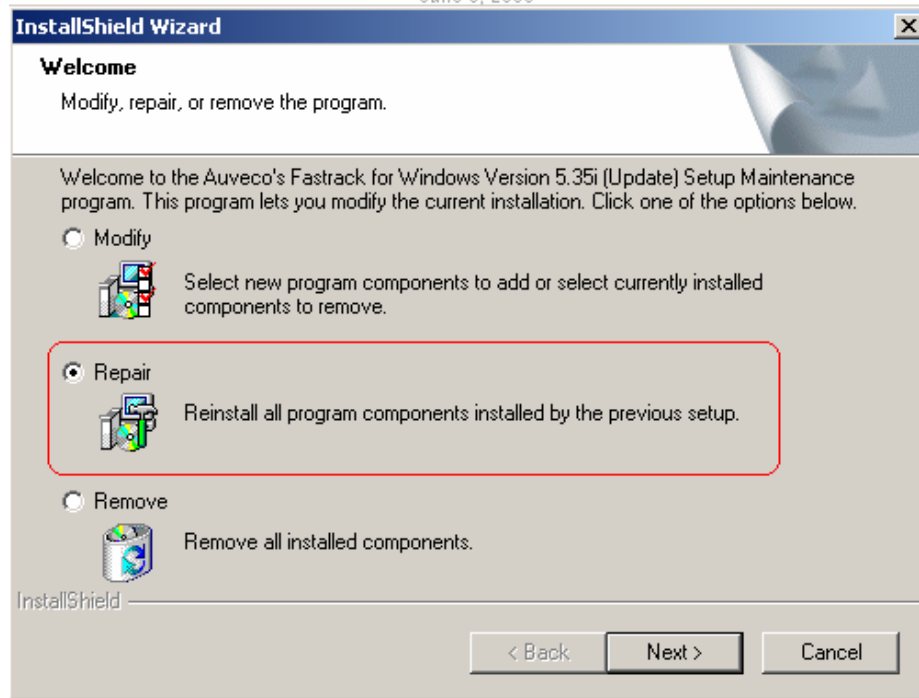

Before you begin, close down all other Windows applications and disable any screen savers you have running. (Go to "Start", "Settings", "Control Panel" and double click the display icon. Click on the "Screen Saver" tab and set screen saver to "none". Close all windows and return to your windows desktop.

New Install STEPS

1. Insert the FasTrack Pro v1.0 CD-ROM into the drive. The "AUTORUN" feature of Windows should bring up the installation procedure screen as shown.

Select "Full Installation" and follow the instructions shown on the screen. If the Install Screen below appears make sure you select "Repair"

2. When installation is finished, remove the CD and store it in a safe location. Close all running programs and **restart the computer to register the FasTrack** software into the Windows operating system
3. After installation, sign in to FasTrack Pro using the Manager's sign in and password which is provided in the cover letter.
4. From the Main Menu, select "File Maintenance", then select "Brand System" and follow the instructions to brand the FasTrack installation with the body shop's name AND the distributor's name which will appear on each invoice along with other FasTrack documents.
5. From the Main Menu, select "File Maintenance", then select "Update OEM Pricing" to load the current item list with OEM List prices into FasTrack.
6. If the FT-SCAN (Palm SPT-1550) scanner is being used with FasTrack, this is also where the scanner programming is initiated. Reinsert the CD and when AUTORUN brings up the menu, install the Satellite Forms and Palm Desktop software at this time.
7. When installation is finished, remove the CD and store it in a safe location. Close all running programs and restart the computer to register the FasTrack software into the Windows operating system.
8. The body shop can now sign in to FasTrack using the appropriate sign in and password. FasTrack is now ready to use!

Note: *Every new registered FasTrack Pro installation needs to be branded! If this is not done, FasTrack Pro will print only "Demo" invoices.*
